Fundraising
Fundraising by PEs remained healthy, with the strongest US$ fundraise since 2008 and a slight uptick in renminbi fundraising.

PE/VC fund raising for China investment*
* Excludes PEs investing in China from non-region specific funds

Source: AVCJ and PwC analysis
In 2014, the volume of fundraising went down. However, the renminbi fund size increased by 17% compared to 2013, while the non-renminbi fund size grew by a solid 43% YoY. Non-renminbi funds has rebounded more rapidly than renminbi funds in terms of fundraising value since 2011. As a whole, the proportion of renminbi fundraising has gone down.

Investments
2014 was a banner year for new investments by PEs with record volumes (up 51%) and values (up 101%); participation in SOE reforms and - for the first time at scale - outbound deals involving Chinese GPs and financial buyers underpinned this performance.

Private equity deals (2008 – 2014)

In 2014, the total VC deal volume shot up by 81% compared to a year ago, reaching a record high since 2008.

![Bar chart showing venture capital deals by volume from 2008 to 2014.](chart)

Source: Thomson Reuters, China Venture, AVCJ, and PwC analysis
China has been the single largest PE investment destination in Asia since 2008 and accounted for 41% of Asian PE deal values in 2014.
Although, globally, China has a much smaller share. China deal value increased by 103% in 2014 compared to 2013. Meanwhile, globally, there was only a 10% increase in deal value.

Source: Thomson Reuters, ChinaVenture and PwC analysis
The second half of 2014 saw a performance equal to the first half. However, if we see it as a whole, the cross-board IPOs backed by PE funds made a strong comeback in 2014. Noticeably, overseas IPOs took the majority of the proportion.

PE/VC backed deal exit volume by type (2012 – 2014 half yearly)

Source: AVCJ and PwC analysis
As expected, there was a rebound in the number of PE exits; trade sale exits by M&A hit a record high, but IPO activity – although at a three year best - remains well below the levels seen in 2010/11.

Key messages
Key messages

Fundraising

- Fundraising by PEs remained healthy, with the strongest US$ fundraise since 2008 and a slight uptick in renminbi fundraising.

- 2004 - 2014, Fundraising for the China and Hong Kong markets dominate Asian PE with around US$365 billion raised (not including allocations from non-China specific funds).

Investments

- 2014 was a banner year for new investments by PEs with record volumes (up 51%) and values (up 101%); participation in SOE reforms and - for the first time at scale - outbound deals involving Chinese GPs underpinned this performance.

- In 2014, the total VC deal volume shot up by 81% compared to a year ago, reaching a record high since 2008.

- Although, globally, China has a much smaller share. China deal value increased by 103% in 2014 compared to 2013. Meanwhile, globally, there was only a 10% increase in deal value.

- PE deals in technology and consumer-related sectors accounted for more than half the total reflecting investment plans intended to align with the strategic direction of the wider economy; a similar trend was seen in deal values: in total there were 15 PE deals valued at more than US$1bn in 2014, another record.
Key messages

Exits

• As expected, there was a rebound in the number of PE exits; trade sale exits by M&A hit a record high, but IPO activity – although at a three year best - remains well below the levels seen in 2010/11.

• In 2014 China bounced back to join level with the US in terms of volume of PE or VC backed IPOs after a fall in 2013.

• The longer term overhang of new investments compared to exits continues to present a challenge to the PE industry.
2015 outlook & eight mega-trends
The scale of PE activity in China will remain robust in 2015. There are exceptionally strong tailwinds for the PE industry in China over the medium term (1 of 2)

The eight mega-trends

- **Demand for capital in China’s private sector:** PE has emerged as a key provider of capital to the liquidity starved private sector in China with real policy support as well as new regulations. The state-owned sector may also start to come into play as part of the ongoing SOE reforms.

- **Consolidation:** But there will be winners and losers in the sector - high quality, professional PEs will thrive.

- **Flight to quality:** Within China, the days where PEs could throw money at deals and expect a “rising tide to float all boats” have gone; careful and professional diligence is vitally important.

- **Outbound, and emergence of China’s home grown global PEs:** Yuan denominated PE fund raising is here to stay and the big players in China will emerge to compete with their global peers; we are already seeing a step-up in outbound M&A involving some of the pre-eminent Chinese PEs and the outbound trend is happening much faster than many people predicted or even realise
The scale of PE activity in China will remain robust in 2015. There are exceptionally strong tailwinds for the PE industry in China over the medium term (2 of 2)

- **The buy-out trend:** there are an increasing number of buy-out opportunities and more PEs are looking to do control transactions.

- **Quantum leap in exit activity:** The industry as a whole is moving into an “exit phase”; the backlog of exits represents a real challenge for the sector; it is more than IPO markets can absorb, and trade and secondary sales by M&A will become more frequent.

- **Importance of A-shares:** The A-share market has been and will continue to be an important exit route for PE.

- **The “wall of money”:** Unlike in developed markets, Yuan denominated PE fundraising has hitherto been dominated by retail investors; this is changing as institutions in China including securities and insurance companies are granted permission to invest in PE; the resulting theoretical “wall of money” which could become available for PE investment over the medium term is measured in hundreds of billions of renminbi.
Thank you
